DHE Funding Support Services

Webinar

Funding opportunities for digital health in 2021-2027

18th June 2021

10:00 – 11:30 am CET

Concept

Over the years, the Central European Initiative has built a wide network of partners and stakeholders through the implementation of projects and initiatives, both as donors and beneficiaries, in the field of health, digital and social innovation.

The objective of the webinar "Funding opportunities for digital health in 2021-2027" is to provide information on the opportunities and content of the upcoming calls of the Digital Europe Programme. The aim of the event is to involve different organisations to present their needs and ideas, in order to promote also potential match-making and future partnerships. The participation of Digital Innovation Hubs from all round Europe, and particularly from CEI countries, will be promoted.

The event will open with a presentation from Funka on the project itself and the funding support services that DHE offers. The programme will continue with an overview on the objectives of the Programme from the EC DG Connect. Brief presentations from the CEI network's organisations will then focus on needs, ideas and potential proposals that can be developed on different aspects of digital health related to the content of the mentioned calls.

Agenda
